Subject: Quick update on OECA actions involving Chemours & PFAS
Location: Karen's Office

Start: 2/25/2019 7:30:00 PM
End: 2/25/2019 8:00:00 PM
Show Time As: Tentative

Required Attendees: Melvin, Karen; Armstrong, Joan

I'm setting aside a few minutes to brief you on OECA actions related to Chemours and PFAS that you should know about. From our side, they involve Clean Water Act 308 letters issued to Chemours by OECA (info request letters) for three Chemours facilities, one of which is in Region 3 (Washington Works plant in WV). There was also an inspection done by OECA in December related to the 308 letters. We just found out yesterday OECA is meeting with Chemours next week. It was couched as a meeting where Chemours comes in and presents and EPA just listens. Mostly it will be about what was asked for in the 308 letters, but I believe folks will be there where were involved in HQ's TSCA NOV's that were sent out recently. We are sending Chad Harsh to the meeting to listen and take notes. At some point we will need to approach OECA senior managers to push for them to be more inclusive with R3 on any further actions they may take at Washington Works, WV. Cathy will be letting Jenn know about the meeting and our plan to send a note taker. I'll try to put this in a briefing paper for you by Monday to include a bit more background info.
